

**SELFRAG AG** with its headquarters in Kerzers, Switzerland, is an ambitious technology company with worldwide exposure in the mining, recycling and pure silicon business; developing, manufacturing, selling and installing lab equipment and industrial plants.

SELFRAG AG is the first and only supplier who has made this technology commercially available for various industrial applications.

**To support (or strengthen) our team, we are looking for an**

## **Mechanical Technician / Mechanic 100% (m/f)**

**with immediate effect or as per agreement**

**Your main assignments:**

- Construction and maintenance of customer plants as well as internal prototype plants
- Independent assembly of individual components and systems according to technical drawings
- Installation and service assignments at both domestic and international customers' sites
- Maintenance support for electrical and mechanical interferences
- Repair and operation of analytical equipment

**Your profile:**

- Mechanical Technician, mechatronic or mechanic with mechanical and electrical knowledge or comparable technical training
- Experience in machine or plant construction
- Readiness to travel in and out of Switzerland
- Team player, quick learning skills, committed, resilient, assertive and flexible
- Good communication skills as well as good manners
- Motivated, reliable and independent
- Enjoy new and challenging tasks
- Language skills: German and English or French and English

We offer a good working environment, up to date working conditions, interesting and diverse work in a small team as well as room for your ideas to unfold.

A young and dynamic team with a zest for action is looking forward to you!
